

of Manor College – Fall 2011

It has been a busy semester for the **Rotaract Club of Manor College**. We began the semester with a Tech Drive to collect old computers and other appliances to help our sponsoring Northeast Sunrider Rotary Club collect almost ten tons of equipment. *Philadelphia Children's Foundation* has partnered with *Life Cycles* to collect and refurbish computers to distribute to needy school children. **This is an ongoing project.** **Roman Volosevich**, in Manor's maintenance department, has been kind enough to help us by collecting and arraigning for ongoing pick-up dates. Equipment can be dropped off with the Maintenance Department in the dorm. There was a pickup on Thursday, December 8, 2011. We haven't scheduled the next pickup yet.
